Dear Speech Communication Department Members,

I would like to propose the interdisciplinary studies of Human Behavior, Culture, and Communication to fulfill my specialty area for an A.A. degree in Speech Communication. From these studies, I currently apply all my acquired skills in my job as a Youth Recreation leader for the City of Santa Clara. The knowledge gained from my Human Behavior classes has given me the confidence to guide teens in difficult situations they may face throughout the school year. The experiences gained from my Cultural classes have helped me become aware and accommodating in my advisory communication with teens of diverse cultural backgrounds and needs. Lastly, my Communication courses have given me the skills needed to become a clear and expressive leader in and out of the work place. Since these courses have allowed me to grow in all areas of my life, I have decided to continue my education at Cal Poly San Luis Obispo in the fall. My area of study will be Speech Communication with a Cultural emphasis. I would like to submit Introduction of Philosophy/Knowledge of Reality, General Psychology, Cultural Anthropology, and Facilitating Collaborative Communication as the courses that qualify for the specialty area of the A.A. Speech Communication degree.

Sincerely,

Signature
