International student (F1) enrollment RE:

Overview

Students who have a F1 visa type were identified during following the three terms, Spring 2010, Spring 2011 and Spring 2012. Table 1 shows the enrollment by college over the three spring terms. The data suggest that F1 student enrollment within the FHDA district has increased over the past three years (by 10% from Spring 2010-11 and 9% from Spring 2011-12). At the college level, F1 student enrollment increased 6% at De Anza and 13% at Foothill between Spring 2011-12.

De Anza	1,637	1,709	1,816
Foothill	777	950	1,088
Total	2,414	2,659	2,904

Southeast Asia (excluding China and Mongolia) has the most F1 students represented within the FHDA district, and their numbers have increased each year. This rising trend is seen in most of the world regions with the exceptions of India/South Asia, Middle East and North America (Table 2).

Figure 1 shows the representation by region among F1 students who were enrolled at De Anza and Foothill Colleges during Spring 2012. The Southeast Asia (excluding China and Mongolia) region composes the majority or 60% (1,728 students) of the 2,904 F1 students. China and Mongolia (23%) and Europe/Eurasia (8%) represent the second and third largest regions.

When examining F1 enrollment as a three-year trend, China has the largest student enrollment within the FHDA district and their representation has continued to increase (from 407 in Spring 2010 to 677 in Spring 2012). With the exception of Sweden, all the top countries represented are from Southeast Asia and China/Mongolia. Unlike the other nations represented, enrollment from Japan and India declined during the same time period (Table 3).

Table 3. FHDA Top Ten Nations by F1 Enrollment, Spring 2010, 2011 and 2012.

The F1 student enrollment patterns at De Anza and Foothill Colleges show some differences. At De Anza, more students enroll from China and other Southeast Asian nations while at Foothill, students from Europe/Eurasia and North America help compose the top ten countries represented (Figures 2 and 3).

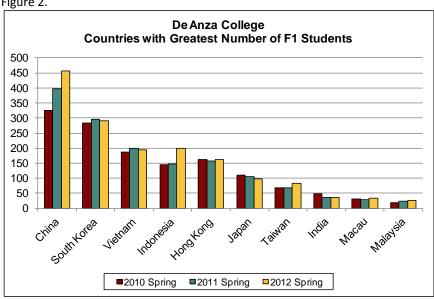

Figure 3.

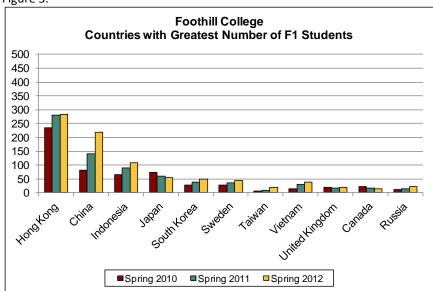

Table 4 shows the enrollment based on the F1 students' country of origin; 109 nations are represented between De Anza and Foothill Colleges.

Methodology

Enrollment counts were determined as of the census date for each term. The spring terms have historically yielded higher F1 enrollment compared to the other quarters. Students were identified based on visa type, focusing on those with F1 status. The countries of origin were determined based on the nation that issued the visa. The world regions were complied based on the categories provided by the International Education Dean (see below).
