

Math 1D: Calculus – Summer 2025
Monday through Thursday 10:00 am – 12:14 pm in MLC-108

Instructor: Dr. Cheryl Jaeger Balm

Email: balmcheryl@fhda.edu

Office number: S-76g

This is a FULLY IN-PERSON class which meets on campus four days a week.

Tips for success (however YOU define it!):

- Expect to spend 10+ hours a week outside of class studying and working on homework. *Schedule these hours just as you would work or class!*
- Form a study group, and make use of the tutoring center.
- Start your assignments early so you can ask questions before or after class.
- Visit the MSTRC (Math, Science and Technology Resource Center) in S-43. Peer tutoring in-person and via Zoom are available. Hours and more information can be found here <https://www.deanza.edu/studentsuccess/>.
- Make an appointment to meet with me (virtually or in-person) if you want to talk one-on-one.

Textbook: *Stewart, Calculus Early Transcendentals* (9th edition)

Student Learning Outcomes (aka what I hope you can do at the end of Math 1D):

1. Apply analytic, graphical and numerical methods to study multivariable and vector-valued functions and their derivatives, using correct notation and mathematical precision.
2. Use double, triple and line integrals in applications, including Green's Theorem, Stokes' Theorem and Divergence Theorem.
3. Synthesize the key concepts of differential, integral and multivariate calculus.

Attendance: You are expected to be present **in-person** for all class meetings. If you miss a class, you are responsible for covering the material before you return to class. You should read the corresponding section(s) of the textbook and get notes from a classmate. You are also responsible for knowing about any changes to the syllabus and/or schedule that may be announced in class. Please stay home if you are not feeling well or awaiting results from a COVID test; otherwise you should plan to attend all class meetings.

Canvas: The class calendar, updates and announcements will be posted on Canvas, which you can access through MyPortal. I recommend that you also download the Canvas app if you have a smart phone. Canvas Inbox is the best way to email your instructor.

Once you have accessed **Canvas**, please go to Account → Notifications and adjust your **Notification Preferences** so that you have selected “**Notify me right away**” for Announcement, Submission Comment and Conversation Message. Other notification settings are up to you.

Calculators: No calculators are required for this class, but you will be permitted to use a *scientific calculator without graphing or Calculus capabilities* during exams. In addition, the free websites wolframalpha.com, desmos.com and geogebra.org/3d will be helpful during your homework.

Cell phones and other devices: You may bring a laptop or tablet to class to access your eBook or to take notes. However, cell phones, tablets, laptops and other electronic devices must not become a distraction to you or your classmates. If I see or hear you using a device during class to access unrelated content or in a distracting manner, I may confiscate the device until the end of that class meeting. You will not be allowed to use a cell phone or tablet during any quizzes or exams.

Homework: You will be given a list of suggested homework problems in Canvas for each section that we cover in the textbook. This homework will NOT be collected or graded. However, solving these problems *daily* is essential to understanding the class material (and to passing your quizzes and exams!). After each class, you are expected to work on all relevant assigned problems before the next class meeting. *Do not fall behind!*

Quizzes: There will be seven (7) in-class quizzes throughout the quarter. You will be allowed to use your homework during all quizzes. *If you do your homework on a tablet, you must print it out to be allowed to use it during the quiz.* Missed quizzes and/or low quiz scores will be replaced by the following midterm exam grade. **No make up quizzes will be given for any reason.** All quiz dates are on the calendar below.

Midterm Exams: There will be three (3) in-class, closed-book midterm exams. Each midterm will focus on a single chapter of your textbook. All midterm exam dates are on the calendar below. One (1) missed exam and/or low exam score will be replaced by your final exam grade. **No make up exams will be given for any reason.**

Quick checks: You will be given 1-2 quick check tickets to turn in each class meeting. You must be present in class to complete these tickets. You may have up to four (4) dropped grades for missing quick check tickets.

Final Exam: Your final exam will be in class Thursday, August 7. It will be cumulative.

Course Grades:

Quick checks	7 Quizzes	3 Midterms	Final
10%	25%	45% (15% each)	20%

Grade	A	B	C	D
Overall percent	≥ 90	≥ 80	≥ 70	≥ 60

Important Dates for Summer Quarter 2025:

- Sun., July 6: Last day to add classes or to drop a class with full refund and no record of grade.
- Wed., July 30: Last day to drop with a “W.”

Disability Statement: De Anza College makes reasonable accommodations for people with documented disabilities. Please notify Disability Support Programs and Services (DSPS) if you have any physical, psychological or other disabilities, vision or hearing impairments or ADD/ADHD. More details can be found here <https://www.deanza.edu/dsps/>

Academic Integrity: Learning involves the pursuit of truth, which cannot occur by presenting someone else’s work as your own. Each student must pursue their academic goals honestly and be personally accountable for all submitted work. **Representing another person’s work and/or AI-generated work as your own is always wrong.** Any suspected instance of academic dishonesty on any assignment will be reported to the college and may result in a 0 on the assignment and/or a failing grade in the class. For more comprehensive information on academic integrity, including categories of academic dishonesty, please refer to https://www.deanza.edu/policies/academic_integrity.html.

Tentative class schedule (subject to change):

Week	Monday	Tuesday	Wednesday	Thursday
Wk 1: June 30 - July 3	14.1 14.2	14.3 14.4A	QUIZ 1 (14.1-14.3) 14.4B 14.5	14.6
Wk 2: July 7-10	QUIZ 2 (14.4-14.6) 14.7 14.8A	14.8B Review	EXAM 1 15.1A	15.1B 15.2
Wk 3: July 14-17	15.3 15.5	QUIZ 3 (15.1-15.3) 15.6	15.7 15.8A	QUIZ 4 (15.5-15.7) 15.8B
Wk 4: July 21-24	EXAM 2 16.1	16.2A	16.2C 16.3A	QUIZ 5 (16.1-16.2) 16.3B 16.4
Wk 5: July 28-31	16.5	QUIZ 6 (16.3-16.5) 16.6	16.7	QUIZ 7 (16.6, 16.7) 16.8
Wk 6: August 4-7	16.9	EXAM 3	Review	FINAL EXAM

Student Learning Outcome(s):

- Apply analytic, graphical and numerical methods to study multivariable and vector-valued functions and their derivatives, using correct notation and mathematical precision.
- Use double, triple and line integrals in applications, including Green's Theorem, Stokes' Theorem and Divergence Theorem.
- Synthesize the key concepts of differential, integral and multivariate calculus.
